

Healthiest Wisconsin 2020 Baseline and Health Disparities Report

This report provides baseline data for the health focus areas in *Healthiest Wisconsin 2020*. It also provides information to document a range of health disparities found for some of the populations and communities in Wisconsin.

Given its scope, the report encompasses 26 chapters and more than 1,100 pages. It is not intended to be printed or read cover to cover. Instead, please select chapters of interest. The report is available in two formats:

- **PowerPoint slide sets:** Each chapter on a health focus area, infrastructure focus area or population is presented as an annotated slide set. The purpose of this format is to foster sharing of the data through presentations to groups.
- **Reference document:** The report is also presented as a compilation of PDFs of the 26 chapters. The PDF version is intended to serve as a reference.

The full report can be found at the following website:
