

2024 Community Health Needs Assessment

The Grant County Health Department is dedicated to understanding and addressing our communities' health and wellness needs. We are committed to work collaboratively to identify solutions to foster a healthier environment for individuals and families to live and thrive. Through the development of our Community Health Needs Assessment (CHNA) we have gained valuable insights into our region's health and wellness challenges and priorities. This information will guide our efforts to work to improve these areas of concern.
